

# ACZ Laboratories, Inc.

A Full Service Environmental Testing Laboratory

## Biota Tissue

ACZ routinely performs inorganic, organic and radiochemical analysis on biota tissue. ACZ's extensive project experience has included ultra low-level metals analysis of fish, waterfowl, benthic organisms, mammal and plant tissue. Due to the sensitivity of native organisms to many low-level man-made contaminants, ACZ protocol includes rigorous QA/QC to determine and verify our results.

Analysis is available for:

- ▶ Fish: (whole, filet or target organs)
- ▶ Small Reptiles: (whole or target organs)
- ▶ Small Mammals: (whole or target organs)
- ▶ Insects
- ▶ Benthic Organisms
- ▶ Plants
- ▶ Waterfowl

**Class 100 clean room and ICP-MS:** allow for the analysis of multiple metals on very limited sample volume. The instrumentation enables ACZ to meet ultra low-level aquatic standard action limits.

ACZ will handle the prep, digestion or extractions in a Level III Bio-Safety hood to meet eco-risk needs.

### About ACZ

ACZ is NELAP accredited and holds certifications in most western states. ACZ's 25,000 sq/ft. state-of-the-art facilities and experienced staff ensure the support of large projects, while still providing superior personalized customer service. Since 1980, ACZ's main goal has been to provide our clients high quality data in a timely manner. A commitment to quality and extensive experience make ACZ the right choice for your analytical service needs.
